## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to Bluetooth technology, classified in class 455, subclass 41.
- II. Claims 13, 14 and 66-71, drawn to synchronization, classified in class 455, subclass 502.
- III. Claims 15-25, drawn to synchronization with details of frequency hopping, classified in class 370, subclass 324.
- IV. Claims 26-35, drawn to roaming, classified in class 455, subclass 432.
- V. Claims 36-47, drawn to roaming with details of frequency hopping, classified in class 370, subclass 319.
- VI. Claims 48-65, drawn to handoff, classified in class 455, subclass 436.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, V and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I has separate utility such as supporting Bluetooth wireless technology in wireless communication systems. The invention of group II has separate utility such as synchronizing base stations. The invention of group III has separate utility such as synchronizing a base station with details of frequency hopping. The invention of group

Art Unit: 2681

IV has separate utility such as detecting the presence of a mobile unit. The invention of group V has separate utility such as detecting the presence of a roaming mobile unit with details of frequency hopping. The invention of group VI has separate utility such as performing handoff based on RSSI measurements or bit-to-error ratios. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mark Friedman on December 31, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
